11 April 1963

HE HORANDUM

SUBJECT: Possible Storage of Offensive Missiles at Ermita, Cuba

- which is one of our regular targets for highaltitude photography, located about four and a half miles northeast of the Ermita sugar refinery in Griente Province.
- 2. The SA-2, the surface-to-air missile being used in Cubs, is more than thirty feet long and might easily be mistaken for a long-range missile by an observer unfamiliar with Soviet missiles.
